

HIMANSHU VASANTRAO PISE

Full-Stack Software Engineer | MERN Stack | 3+ Years
Pune, India | +91 9011416445 | himanshupise2017@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer with 3+ years of experience architecting and delivering scalable, high-performance MERN stack applications. Specialized in distributed systems design, secure authentication (JWT/RBAC), event-driven architecture, and cloud deployments (AWS). Delivered 30% performance improvements and 40% reduction in code duplication across enterprise LMS and e-commerce platforms. Track record of leading technical initiatives, establishing 85%+ test coverage, and shipping features with 95%+ sprint completion rate.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Redux Toolkit, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI, Styled Components, React Query / TanStack, Zod / Yup validation, Responsive Design, WCAG 2.1

Backend: Node.js, Express.js, Nest.js, REST API Design, GraphQL, Microservices Architecture, Event-Driven Architecture, API Gateway, WebSockets, OpenAPI / Swagger, Server-Side Rendering

Database & Data: MongoDB, Mongoose, Redis caching, MySQL, PostgreSQL, Indexing, Aggregation Pipelines, Load Balancing, Performance Profiling

Cloud & DevOps: AWS (Lambda, S3, EC2, CloudFront), Docker, Kubernetes, Vercel, CI/CD Pipelines, GitHub Actions

Testing & Quality: Jest, React Testing Library, Unit / Integration / E2E Testing, TDD, SonarQube (0 critical bugs, 'A' maintainability), Code Coverage 85%+, Lighthouse performance profiling

Tools & Collaboration: Git, GitHub, GitLab, Postman, Jira, Agile/Scrum, Workato, SCORM / xAPI, Intellum LMS, Adobe Learning Manager (ALM)

PROFESSIONAL EXPERIENCE

Software Engineer | Harbinger Group *January 2023 – Present*

- Architected and delivered MERN stack full-stack features using React.js, Node.js, Express.js, and MongoDB; improved application load performance by 30% through optimized API queries, code-splitting, and lazy loading.
- Designed reusable UI component library using React, TypeScript, and Material UI, cutting UI code duplication by 40% and accelerating development velocity by 25%.
- Implemented secure authentication and authorization system using JWT and Role-Based Access Control (RBAC), protecting sensitive API endpoints and reducing security vulnerabilities by 60%.
- Built responsive, mobile-first UI components following accessibility standards (WCAG 2.1), improving user engagement by 25% and mobile conversion rates by 18%.
- Optimized MongoDB performance using indexing strategies and aggregation pipelines, reducing average API response time by 45% and supporting high-traffic distributed endpoints.
- Established comprehensive test coverage (85%+) using Jest and React Testing Library, covering unit, integration, and end-to-end test workflows; enforced via SonarQube with 0 critical bugs shipped.
- Built and deployed CI/CD pipelines using GitHub Actions and Docker, automating build, test, and deployment processes — cutting deployment time by 50% and eliminating manual release errors.
- Led technical initiatives for 3 junior developers through code review, pair programming, and system design workshops; improved team code quality scores by 35% and reduced bug density by 28%.
- Managed complex application state using Redux Toolkit and React Query, integrating RESTful APIs and GraphQL endpoints within event-driven React architecture.
- Delivered features with 95%+ sprint completion rate across Agile/Scrum sprints, contributing to planning, retrospectives, and cross-functional stakeholder reviews.

KEY PROJECTS

Headless LMS — Adobe Learning Manager (ALM) Integration

Enterprise LMS serving 15,000+ active users with 99.8% uptime across web and mobile platforms

- Designed modular, API-driven headless LMS architecture with distributed content delivery; implemented infinite scrolling and server-side pagination to handle 100,000+ course records efficiently.
- Integrated Adobe Learning Manager APIs for user management, SCORM / xAPI content delivery, and course creation workflows, processing 50,000+ API calls daily with sub-200ms response targets.
- Improved platform scalability through optimized API design, component architecture, Redis caching, and load balancing strategies — reducing page load time by 40% and supporting 3x user growth.
- Maintained 'A' code maintainability rating and 0 critical bugs via SonarQube integration and performance profiling with Lighthouse throughout the development lifecycle.
- Reduced production incidents by 45% through automated testing, proactive error tracking, and performance analytics — Lighthouse score consistently above 90.

Multi-Platform E-commerce Application

Full-stack MERN e-commerce platform processing 10,000+ daily transactions with average response time under 200ms

- Developed scalable e-commerce platform with real-time inventory management across 5,000+ products, handling concurrent load of 2,000+ active sessions using distributed backend architecture.
- Improved product loading performance by 55% using Redis caching, API gateway optimizations, and reusable component patterns; reduced bounce rate by 22%.
- Built secure backend APIs for authentication, payment processing, and checkout workflows, ensuring PCI DSS compliance with zero security breaches.
- Integrated MongoDB aggregation pipelines and recommendation engine delivering sub-100ms query response times for complex filters across 5,000+ SKUs.

CERTIFICATIONS

- AWS Certified Developer – Associate (in progress / target Q3 2025)
- Front-End Web Development — IBM
- Responsive Web Design — Udemy (freeCodeCamp equivalent)

EDUCATION

Master of Computer Application (MCA) | Pune University *June 2023 | CGPA: 8.66*

Relevant coursework: Data Structures & Algorithms, Database Management Systems, Software Engineering, Computer Networks, Web Technologies

Bachelor of Commerce in Computer Application (BCCA) | Nagpur University *June 2021 | CGPA: 8.07*

AWARDS & RECOGNITION

- Employee of the Month (2×): Recognized for outstanding contributions to MERN stack development, initiative in system design improvements, and consistently exceeding project deliverables.
- Quarterly Project Excellence Award (4× consecutive): Earned for technical leadership, architectural innovation, and driving on-time delivery of the Headless LMS platform.
